SUMMARY

I am a qualified and professional frontend developer with around 4 years of experience in ReactJS and website design using HTML & CSS. Strong creative and analytical skills. Team player with an eye for detail.

EXPERIENCE

FRONTEND DEVELOPER

Superworks Pvt. Ltd.

April 2021 - July 2024

Management System Development:

Developed integrated management systems (HRMS, PMS, Payroll, ATS, Chat) to streamline HR operations, performance tracking, payroll processing, recruitment, and team communication. Used modern frontend frameworks and real-time technologies to create responsive, user-friendly interfaces with seamless backend integration and data synchronization.

- **HRMS Module:** Played a key role in developing the Human Resource Management System to enhance HR processes and employee data management; implemented intuitive UIs for onboarding, attendance, leave, and performance tracking using React and Angular.
- **Performance Management System (PMS):** Led the development of the PMS module with interactive dashboards and reports; integrated with third-party APIs for real-time performance evaluation and goal tracking.
- **Chat Module:** Developed a real-time chat system using WebSocket technology with features like chat history, file sharing, and group conversations; built a responsive interface using Vue.js and Redux.

- **Payroll Module:** Contributed to automating payroll with complex algorithms for tax deductions, bonuses, and benefits; designed user-friendly tools for payroll admins and integrated with accounting systems for compliance and reporting.
- **Applicant Tracking System (ATS):** Spearheaded the ATS module to streamline recruitment workflows; created responsive job application forms and interfaces for efficient candidate management.
- **Collaboration & Integration:** Worked closely with backend and finance teams to ensure seamless data synchronization and system integration across all modules, delivering high performance and reliability.

SOFTWARE DEVELOPER

Dholakia Technologies LLP

Sep 2024 - Present

ERP System for Diamond Company:

Contributed to the development of a tailored ERP system for the diamond industry, streamlining inventory, production, and distribution. Built intuitive dashboards for tracking, grading, pricing, and certification. Used React for a responsive UI and ensured seamless integration with accounting, supply chain, and CRM systems, optimizing performance and scalability.

SKILL:

Proficient in HTML5, CSS3, JavaScript, and frameworks like ReactJS. Experienced in building responsive, mobile-friendly UIs with Bootstrap. Skilled in RESTful API integration, Git version control, and agile development. Strong problem-solving and code optimization abilities.
